

Music lives in hearts from old to young
Music can be made with instruments or even....tongues
And that's how I found what I wanted to do
The happy feeling it gives me when I'm feeling blue

It was the man who said look up at the world and smile
You can mend broken hearts that were broken for awhile
So I took the guitar and I started to sing
About what I felt inside....What I was truly feeling

The strings vibrate as I strum
The wind blows as I hum
The still grass dances to my melody
As the song makes me feel so free

The honey that I tasted with my ears
Is my medicine to my darkest fears
Music in my life is what I live for
All my problems wash out to distant shore

The Heart Of Music

Jercell Respicio

SHOWER

BY: JAN HAGEMEISTER

It's my company when I'm feelin' Lone'
It's the stars that I've seen that have shown me home
It's the band-aid to my deepest cuts
It's the rhythm that makes me strut

It's the love that I seek to obtain
It's my Tylenol when I'm in pain
It's my angel when I'm in fear
It's so obvious that music is always here

Even when I've been awake from seven to two
Making music makes my day brand new
Even my heart beats in rhythm from bum to boom
And when I'm scared I hear it go from Dum to doom

So if you're sad, happy or mad
Make some music and I'll guarantee that you'll be glad
Even if you don't sound good
As long as you're happy, music is a should
